Dragon age inquisition best perks guide

Belts Rings Best Tactics Here is my recommendation on how you should set up your Tactics: Shadow Strike - Preferred or Active. This will ensure that you make the best Varric build: Critical chance - I recommend having at least 60%. Shoots multiple projectiles from short range. 1 Malika's Guard As Varric will not concentrate on flanking damage this amulet will greatly increase the overall attack power. This ability will deal the most damage for Varric Poisoned Weapons - Preferred or Active. Varric should use this as often as possible to restore MP Leaping shot - Active. Usually, one of them can be obtained easily and another requires having high-level characters. 3 Amulet of the Rogue This amulet will increase both critical chance and critical damage 4 Superb Amulet of Cunning The amulet will increase the critical chance, allowing to reduce ability cooldowns. Conclusion Thank you for reading this Dragon Age Inquisition Varric build. This should be easy for Varric as he will be avoiding enemies most of the time. I do not recommend this. Should be used in case Varric gets attacked by enemies. Grip Firm Bianca Grip Provides +8 Cunning, the largest amount for obtainable Grip. The main point is to upgrade it as soon as you have better components. In this Dragon Age Inquisition Varric build guide I will try to cover all you need to know for this companion Even though you can build Varric as a Dual wielding rogue. When you or your allies do a critical hit they reduce your cooldowns. With it + Leaping Shot Varric can take down dragons solo 5 Elemental Mines I take this ability just for progression 6 And Take Them Down Boosts entire party critical hit chance by 5% 7 Death from Above We take this ability just for progression 8 Leaping Shot + Shot from the Shadows Best offensive archer skill. It is consumed once you use it. Moreover, not having good gear will make you weak in close combat. This is the only crossbow in the game. With the upgrade, Varric will also enter stealth after the attack 9 Stealth Good ability to use so Varric could escape danger 10 Evasion Passive ability increases odds of survival for Varric 11 Evade We take it just for progression 12 Shadow Strike + Long Shadows This ability is important as it allows Varric to restore stamina. This should be your priority investment as it gives the biggest damage boost. All other abilities should be set to Disabled. Moreover, do not forget to put ruins Bianca - obtainable upgrades Type Item Description Aiming Module Aiming Module III Provides the largest bonus +8% to critical chance Arms Superb Crossbow Arms The Trespasser DLC alternative is available in the Winter Palace Arms Bianca Arms VI Although not the best by pure damage, it gives a large bonus to critical damage. Boosts Critical Damage, Critical Chance, and Attack. Archery tree Will give you Leaping Shot, strongest bow user shooting ability and Pincushion Artificer tree This tree has extremely strong Focus ability and passive skills Subterfuge tree Our aim is to get Shadow strike + upgrade Abilities investment - long version IMPORTANT: Get relevant Amulet of Power for Varric to maximize the number of ability points Order Skill Description 1 Spike Trap + Pyrotechnics Great ability with Crowd control capabilities 2 Opportunity Knocks One of the best passive talents in the game. Remember that you will need to respecialize skills before making this build Abilities investment - short version This section is a short version of abilities that I recommend getting to create this build IMPORTANT: Get relevant Amulet of Power for Varric to maximize the number of ability points Sabotage tree Not a mandatory tree, but gives a few perks to maximize Varric damage. The upgrade also enables it to be ranged ability 13 Caltrops We take this ability for Progression 14 Looked Like It Hurt Each critical hit will restore your stamina by 10 Late game skill investments At this point, you will maximize Varric damage output by getting a few more necessary talents Order Skill Description 15 First Blood We take this ability for progression 16 Explosive Shot We take this ability for progression 17 Pincushion Each consecutive hit with a bow (in this case Bianca) will increase your damage by 5% 18 Fallback Plan We take this ability for progression 19 Tricks of the Trade Boosts the duration and status effects of all skills that your party members use 20 Poisoned Weapons + Infected Wounds For a short period of time coat your weapons with poison increasing your damage 21 Fighting Dirty The poison effect lasts longer Stats and Attributes In this section, I go through the recommended stats that you should look at when choosing what equipment to equip. This way he can ensure that enemies are knocked back Elemental Mines (Optional) Disable or Active. Cunning - if you are not able to get direct investment to critical chance get Cunning bonuses Attack - provides larger damage bonus, better than dexterity as you usually get much higher bonuses for Attack Dexterity - alternative to critical damage, but usually you get less of it compared to direct boost to Critical Damage Equipment guide In this section, I will cover what gear should you use for this build Bianca The only Weapon that Varric will use for the build is Bianca. Armors - craftable Helmets - obtainable Helmets - craftable Amulets Priority Item Description - Amulet of Power Gives Varric a single ability point. Try out this ability and see if you prefer its usage Stealth - Active. The reason being is that if you play on Hard difficulties it is easier for Varric to survive with Bianca. 3 Set Them Up Gives 25% damage boost to traps 4 Hail of Arrows Extremely strong Focus ability. AI is simply not clever enough to handle all the micromanaging that this type of build needs. 3 Masterwork Prowler Armor This armor reduces ability stamina cost by 20% if not attacked for 5 seconds. Varric is one of the first companions to join the Inquisitor. Due to this, I recommend Varric + Bianca build Important! The companion build is compatible with Nightmare difficulty, however, to pull it off correctly, be sure to have a good Inquisitor build Contents Before reaching level 11 I suggest using the same build, doesn't matter if you like daggers or bows. He is a charming Dwarf always full of interesting banter. Feel free to leave feedback below Varric should place the trap at least once below his feet until enemies come by. You want this skill to be always active Spike Trap - Active. This guide should help you understand how to make your companion as strong as possible. 2 Superb Amulet of Dexterity This amulet will increase dexterity resulting in higher critical damage. Order Skill Description 1 Stealth With this skill, Varric can easily avoid danger 2 Long Shot + Eagle Eye Great skill for openers. Critical Damage - After you have a high critical rate (50 %+), invest in critical damage. Bianca - craftable upgrades I list two options for the upgrades. It will ensure that you both have fast cooldowns and an almost full stamina bar. I recommend using this with Varric at the start of the fight 3 Death From Above Ability is taken just for progression 4 Leaping Shot + Shot from the Shadows Extremely strong ability if used when enemies come close by 5 Poisoned Weapons I would say this is optional, but it increases overall DPS for Varric, good skill that AI can use 6 Looked Like It Hurt Restores Stamina on critical hits, works great with Leaping Shot 7 Evasion Increases survivability Once you reach about level 11 start working on the build below Varric Archer build This build concentrates on playing Varric as a rogue archer with his bow/crossbow Bianca. Armors - obtainable Priority Item Description 1 Stone Stalker Coat This armor is a perfect match for this build as it provides a large boost to of 45 Cunning resulting in a much higher critical chance 2 The Skin That Stalks Obtainable only in the Trespasser DLC.
