For this work, you need to make sure that the right school is selected. Use your Google CIHS CIHS account Khan Academy has taken care of the activities for you based on your scores. You can click on anything to start. What do you do when a cousin calls you help you? Å, helps in any way you can. So when your name is Salman Khan and your cousin calls from 1,000 miles away to help him with her math tasks that help you. Be a hedge fund manager with degrees from mit and harvard, it was easy for him to train it how to solve the problem of the distance. He remembered to collect Yahoo's phone and doodle to help his niece with his math problems. There. Next, he started making videos of math lessons to share with family and friends and published them to YouTube. The restriction of the size has worked at him favor of him - he had to keep his lessons about 10 minutes. Today, its Khan Academy hosts over 2,700 videos and expanded by mathematics to include other topics, such as science, economy, finance and history. It is free and highly accessible. Someone with a computer and a Google or Facebook account can access this wide range of lessons and practice exercises. Mr. Khan didn't stop there. Although he has not invented the term "floating the class", he certainly became a poster boy for this new teaching methodology. Inversion of traditional teaching methods, with children watching lessons at home and do exercises at their own pace, brought some teachers to rethink their classrooms. The economist aims at one of such an example of a class of 12-year-old students who work through the exercises of the Khan Academy and the teacher exposed to an online dashboard of the student's progress, identifies individual students struggling with concepts Specific and teaches them to one by one in the classroom. I'd like to empty a cautious flag here, though. The headleguard is still built on the traditional model of teaching and learning. Children listen to lessons and learn. For younger children this may not be the preferred learning method. They often do not have patience or focus to sit even the courier lessons before they can interact and Å € ä,™, ä € ä € "we believe that they provide younger students with tutorials that are interactive from the most productive get-go for these Students. So because we launched K5 learning. If you are seeing this message, it means we have trouble loading external resources on our website. If you are behind a web filter, make sure the domains *.kastatic.org and *.kasandbox.org are unlocked. Geometry - Geometry of the Khan Academy Learn for free for mathematics, art, computer programming, economy, physics, chemistry, biology, medicine, finance, La History and more .ä, Khan Academy offers practice exercises, educational videos and personalized learning dashboards that enhances students to study at their own pace inside and out of class.
