Well with the infinite customization options at your fingertips, you can easily deceive people to think wearing a rolex with a personalized watch face. Because while an intelligent Android watch is a futuristic device, the best we still remember their analogue brothers. They often have that classic look and look. If yours doesn't do it, you can simply customize it for a timeless look (metaphorically, not literally). To start, you just need your Android phone, your wear OS device and some patience for download. He entered. Related: 5 best Android wear games You need to know that there are two apps that I suggest you use to install a custom Rolex watch face, first of which it is available. Only this app gives you access to 15,000 faces of free and premium watches and the drawings are added weekly by various brands and the visualization community. If nothing captures your imagination, you can even create your design. Facer also states that you trust millions of smartwatch users and has download numbers to show it. Ready? Follow the following steps: Download the Facer app and open it. Take note that while this is free to download, they have a monthly premium plan that allows you to access more hours of guard (bringing the total to 75,000) and removes ads. If you prefer to pay only a one-off tax, they also have a more plan that removes ads and gives you a rotation of other features. Then be asked to select the operating system wear device you are using. If you can't find your smartwatch on the list, don't worry. Choose a similar model. A fantastic factor thing is that it is compatible with all operating system wear devices. The first page you see when you download the App Factor if you don't already have, download the RisiBalk Companion app on your watch. Make sure you have selected the factor as the watch's face. On the app on the phone, you have the opportunity to search and install various faces of custom clocks. But if you go ahead and look for a Rolex design, the results are available short. Instead the vacation app homepage, rapid search for Rolex Watch custom coatings on your mobile browser. There are some beautiful Rolex designs available in repositories and forums like XDA developers. Choose the design you want, then download it on your phone. If you choose to download the design on your laptop, you can do it too. Just remember to copy the file to your phone later. Once you have downloaded the file, return to the Facer app. Go to your Watchbox page by selecting the heart icon in the lower menu. The WatchBox menu contains all your faces of the saved clock Select the Import button. This is the clock button at the top right. If you can't do it, try setting the permission first by going to Settings> App> Accompaniment> Permissions then activating storage. Importing a custom clock face in the Facer app locate the file you downloaded, so it matters. The design will now be displayed in the Facer app. Make sure your phone is connected to your watch. Go to the Rolex watch face you want to use, then The Sync button. Take note that it may take time for synchronization to finish. Synchronize a Rolex Face clock to your OS device wear device Another app that you can use to get a custom Rolex design is the watchmaker, which states that it is the largest community of watches in the world. With it, you can browse more than 60,000 watch faces, with over 50 drawings added every day. And as a facer, it has more than a million downloads on Google Play Store and offers you the To create your own design. Now move forward. . . Download the watchmaker application and open it. You can download the free app or its premium version (\$ 7.99), which gives you access to all selection ads and removes. You also have the opportunity to update in-app when you download the free version. The process is similar with the Facer application. YouÅ € You will be asked to select the Wear Operating System device that youÅ € is using, set permissions for the application to access storage folders, eun download the companion application on your watch. Selecting the wear operating device on the App Watcher youÅ € ll then be taken to the watchmaker's homepage where you can browse tons of dials. Type A RolexÅ € In the search box and youÅ € ll get a couple of beautiful designs. Getting one of these would require you to update the Premium Plan, though. Some custom Rolex watch overlooks the App watchmaker selects the design you want and synchronize it with the clock by touching the green button. Synchronize a Rolex watch aimed at the Wear operating device alternatively, you can also search for other Rolex quadrants to your phone's browser. There are some pleasant designs on the WatchFaces.be website, for example. Download your chosen design for your phone. Import the drawing in your watchmaker app going my watches (the icon to the right in the lower menu). Click on the top right, vertical suspension dots menu then select Import Watch. Importing a custom dial in the watchmaker app after import, synchronize the phone with the wear and waiting operating device for the Rolex quadrant to appear. All Rolex designs are trademarks, so you need to be a little more creative with getting a dial inspired their brand. Try one of these methods. Get that luxurious appearance and hear for your watch while a Rolex face watch is an absolutely nice way to customize your watch, this design is actually just the tip of an iceberg. These working methods for another personalized clock also addresses, so to go ahead and explore your HeartÅ € s content. If you have other suggestions for installing a custom Rolex dial on the wear operating device, let me know in the comments below! Photo of credit credit presentation
