Goliard SongSlatin Songs wrote from the 10th to the 13th century. They are among the first examples of Western secular music. They were created by wandering scholars called Goliards. The name probably comes from a mythical patron of poets, Bishop Goliás. Goliard songs praise the beauty of nature and pleasures of love, drink and student life. Many satirize the Church and society. The composer of the 20th century Carl Orff based his Carmina Burana (1937) in a German collection of the 13th century Goliard songs. ColdPlay Lead Singer Chris Martin | Scott Gries / Imagereerect Music is a wonderfully different medium - there are thousands of well-known and dark instruments around the world, and there are probably millions of melodies that can be thought and made available. Unfortunately, popular music tends to boil the music to a simpler formula, and consequently, listeners might end up hearing different iterations of the same melody, slightly refurbished in a different way for consumption. Within the often narrow model of pop music, it is not surprising that the same melody would be superficial in different songs, but we compiled a list of some of the worst offenders. These are eight successful songs that sound exactly like other songs. 1. â € "All the summer long" of Kid Rock Kid Rock has the rare distinction of a song to hit a hit song that sounds exactly like not one but two other successful songs. The lyrics repeatedly refer Lynyrd Skynyrdâ € â€ œSweet Home Alabama, â € "So it does not surprise that the music does the same at various intervals. But the riff of the piano on which the song of the child Rock is built, is exactly the same as Warren Zevon's Classic-Rock Radio, "Werewolves of London.â € officially, the champions of the song both â € TM The '70s hit, but it is difficult to forgive the "samples" when there is almost nothing original added to the fundamental music. 2. â € "Hoyellow" by Coldplay One of the favorite songs of fans of the alternative ethereal rock band, Coldplay, brings a remarkable resemblance to a ballad from â € œlantiato e incantata", the debut album of the influential â € TM Outfit rock indie 90s, pavement. Despite some instrumental differences, the two songs are almost identical but for vocal melodies when overlapping each other. Just listen to those soft and morbid guitar tones and deliberate Time, and tell me I don't feel it. 3. â € œNonningâ € Green Day while there is no Coldplay Coldplay Coldplay evidence knowingly ripped the sidewalk for â € œyellow, â € "You can easily make a case that the green day ripped the knots, simply based on an IFFY story of non-original material â € â € œBoulevard of broken dreams" It seems suspicious similar to the oasis â € œwondallwall, â € and theriff of â € â € â € â € american water "is almost identical to the opening of one in â € œDoublewhiskeyCokeniceâ € di Dillinger Four, for appetizers. But the worst insurgent for my mind is their hit song â € œwardnâ € from the album 2000 with the same name, riding on the same identical riff riff â € "Book of illustrations" of the Kinks. 4. â € "Karma policeâ € of Radiohead yes, one of the most acclaimed bands of the last twenty years has stolen the riff of one of their most famous songs from their most famous album, ok computer. Furthermore, they have not only robbed anyone. The central piano riff of the song is undeniably in debt with â € "Sexy Sadieâ € of the Beatles, only slightly accelerated to stand out. Nothing has become similarities between the two songs, unlike Radiohead, a similar derivative â € "Creepâ €, which has some similarity with â € The Air That The Breatheâ € of The Hollies, who quoted Radioheads for plagiarism and has Won. 5. â € "Are you gonna be my girlâ € Jet The Australian Rock Band Jet seems to have stolen his only success in Iggy Pop, whose song â € "Lust for Lifeâ € contains an identical battery and guitar sound. The band is not agreement, claiming that the song was influenced by the first songs doo-wop â € "The drummer Chris Cesert even said a meeting with Iggy Pop in which both said their songs were inspired In groups like supremes. Whatever they say, it's impossible not to recognize the similarities between the two songs once you have heard of the dispute. 6. â € "Whole Lovi Lingsâ € LED Zeppelin Led Zeppelin built a career as one of the most successful rock artists, imitating blues music and adding their burglar. It is not an attack on the band, but simply a fact of their existence. To prove it, just look at â € â € "Whole Loviâ Loveâ € one of the greatest successes of the Zeppelin, who stole his melody and most of his texts at Bluesman Willie Dixon â € "You need love.â € Writer. The 7. â € "Best Song Evers" of One Direction The Whoaâ € " s â € "Baba orâ € Riley, often mistakenly called â € Teenage Wasteland ", seems to be a clear inspiration for the single â € "Best Song Ever ", Published with a video in 2013 by English Boy Band One Direction. The progression of the synth and the opening riff have been defined a clear Ripoff and an intentional tribute to the famous song, so it is almost impossible to deny the similarities. According to some sources, Who's Pete Townshend was even accredited as co-author of the song â € â € â € â € â € â € "deservedly", therefore, I would add. 8. â € "Dani California" of the Red Hot Chili Peppers listeners asked Tom Petty to sue other artists for hit derived songs in at least two occasions, although Petty refused each time. Strokes openly recognized the inspiration that graduated from Petty's album â € "American Girlâ € for their single â € "Last Nite". Petty then observed, â € "It doesn't bother me." A US radio station then asked Petty to sue the Red Hot Chili Peppers for plagiarism. Because of the similarities between their song â € "Dani Californiaâ € and his â € "Mary Jane" last dance ". Once again, Petty rejected kindly, saying many rock songssimilar. After comprising this list, I find it difficult to discuss with this, Tom. In the absence, these songs at least share the ability to leave their stamp on a vast musical landscape. While the performance of the chart, the airplay radio and the longevity are all criteria to help build a list of the best of the best, these essential songs of the 1980s are announced vital through a pure force of gravity. each of these melodies, presented in no particularit is simply impossible to ignore it in the context of the 80s music. Peter Carrette/Getty Images Regardless of how many times this song is played, it preserves a magic that exists only for the more solidly constructed musical compositions, universally themeed and presented in a unique way. The key piece of Sting's songwriting from Synchronicity in 1983 achieves a rare pop/rock perfection, with a top-notch vocal performance, a revolutionary guitar riff and a highly personal lyrical theme that explores obsession, broken heart and romantic destiny. Somehow, the song seems familiar despite its originality. «Every Breath You Take» is certainly one of the most beautiful moments of the anthology of The Police and the musical scene of the 1980s: This mainstream power rock band from the Chicago area is mainly known for its power ballads that have always had a talent for the realization of some of the greatest texts of the decade. But with this song, represented prominently and appropriately in the film, Survivor brought rock arena on a completely new plane of spavalderia. The misuse of metaphor and cliché sometimes becomes a bit discouraging, but the hold of the melody and the opening of the power agreement are undeniable. Hulton Archive/Getty Images Foreigner has enjoyed a series of successes in the 1980s, but no one has reached an exaggerated level of romantic desire like this heavy keyboard love ballad. Guitarist Mick Jones has always been an underrated composer, and his mastery has never been highlighted as when the calm of the lines of this song explodes in a chorus crescendo perfectly suited to Lou Gramm's impressive vocal range. When the gospel chorus enters the stage at the end, it is a dressing perfectly appropriate for this package. Rob Verhorst/Getty Images Some hard rock bands from the 1970s and 1980s turned into a whale of despair or simply of pure greed when the hair metal phenomenon started. In the case of Van Halen, the stylistic twist seems as organic and wonderful as the splendid riff of the syntheizer that feeds this track, or the exuberant leap of David Lee Roth, or the contagious grin of Eddie Van Halen. On that occasion, the band wrote an almost perfect pop song. This success was the peak of the band's career. Unfortunately, the genre spent the rest of the decade slowly rolling down from this moment. Lex van Rossen/Getty Images The path of U2 to celebrity (not to mention its legendary status) was an intriguing path, full of explorations of a variety of musical styles and artistic approaches. One of the many great songs of the group, With or Without You, achieves a perfect balance between pop and rock sensibilities. Captivating, obsessing and indelible, remains in someA testament of his age and a timeless classic. Furthermore, it doesn't hurt that the song has one of the best low lines in the history of rock. Paul Natkin / Getty Images For the raw and cheeky, Axl Rose and his comrades then knew how to create intricate and refined rock songs. The sound of the band band no happy incident, and this song more than any other reveals the Guns N' Roses at their peak, collectively and individually. Rose has never revealed her versatility as a singer in a more complete way than through the calm verses and the ferocious choral sections of the song. It is a rock guitar de force tour supported by unexpected operatic sweetness, and the wide charm of the song contributed to bring 1987 to a peak of mainstream music that no one would ever expect. 20th Century Fox/Getty Images The peak of the 1980s of the great diva Whitney Houston produced several singles worthy of being included in the best-of-lists, but this represents its best mix of danceable rhythms and an uncontensible choir. Houston was an indisputably refined and precise singer, but perhaps his best attribute was his ability to select top-notch material. This track celebrates an incomparable 80s that we will hardly see, and it is so contagious that even many rock fans have been subjected to its seduction. David Redfern/Getty Images One of the greatest collaborations of the 1980s was undoubtedly the Welsh singer, with unmistakable voice, and Jim Steinman, author-producer of Meat Loaf. It was a great match, as Steinman's gift for the opera bomb and exaggerated arrangements helped him produce his best musical moment. In concert, Tyler's bold but sensitive voice perfectly conveyed the desire of this great love song. George Rose/Getty Images Speaking of dances and 80s, you can't go too far without talking about twoty pair of male and female singers. There is no better example of this phenomenon of this exaggerated but undeniably engaging melody of 1981. Lionel Richie has certainly traveled the same type of terrain in his solo career, but the addition of a singer with whom to exchange verses elevates the song to another level. It was helpful that Ross was beyond the mood to carry out the song alone. Michael Ochs Archives/Getty Images Although it is easy to mix the "na-na-na-na-na" part with the theme of the Smurfs, this song is a highlight of the entire decade's music catalogue. The band's frontman, Peter Wolf, was made to measure for the 1980s with his spavaldo and exuberance of Mick Jagger, although he had more than paid his debt before the band became pop. It can be undeniable that the group has achieved its greatest success during the 1980s, but the memorable playfulness of this song is a great reason.
