Recover data after flashing rom

How to flash recovery rom.

By Greyson Ferguson The Flash Drive Image of Jimcox40 from Fotolia.com Chipsbank is an electronics company that produces Flash Drive. The flash unit has no actual moving parts so as not to be generally in any important problem when using the device. However, occasionally memory on the card can fail, due to a defective virus or file. If the device does not work, it is necessary to reformat the flash unit to restore it to the work order. Connect the Chipsbnk flash unit to any USB port available on your computer. Click the "Start" button, followed by "My Computer" (or "Computer" in the latest versions of Windows). Right-click on the USB flash unit, then select "Format" from the drop-down menu. This opens the "removable disc format" window. Click "Start" and Flash Chipsbnk unit formats. Once the formatting process is completed, the flash drive memory is restored and you can start using the memory again on the Flash Unit.
