Is there a find my friends for android

Is there a find my friends app for android and iphone. Is there a find my friends app for android.

Did you know that Android was rejected many times? Before becoming the most used mobile operating system, the software was also refused by Samsung. According to his ENGR developer. Andy Rubin, in 2005 their team of eight men volued to South Korea to launch their operating system to the 20 high-ranking Samsung executives. But instead of positive reception, they were met with dead silence and stayed outside the meeting room after their presentation. Fortunately for Rubin, things turned quickly. Who would have thought that the refusal was actually a blessing under lie offshell? Two weeks later, the team hit the jackpot when Google has decided to buy the software for a \$ 50 million Whopping. In 2008, Google and Android released the HTC dream, the first phone released commercially with an operating system. It was called T-Mobile G1 in the United States and was G1 in Poland. A few years later, smartphones have become the norm. Samsung was therefore forced to join the bandwagon and purchased the rights to use the Android operating system. However, Android has a great market share, we too can not deny the importance of the iOS platform. Apple is the Frontrunner in iOS development. In 2007, the iPhone was actually assigned the invention of the year ". It is also the main money manufacturer of the company. Find my friends is an application for iOS devices. It is used to locate Friends and family who also have an Apple device using GPS. For those who wanted to use Find My Friends app for their Android friends, Google now allows you to share your position, no matter what device you are using. Trusted contacts It is an app available now for both Android and iOS users. But just like the APP Find My Friends, you must accept to share your position data with Google. Never miss your family locations from your group on your next vacation apps to find the you or friend or family. To start, open the app and update you in real time position of your friends or family on the map that shared the location with you. Cool, the app will tell you even if any of your friends friends using iPhoneThe Find my friends from Apple provides a simple way to share your location with people you want to meet or keep track. Friends sharing their locations with you appear on a map so you can see quickly where they are. Since my friends work with contacts and maps, you can do things like finding the fastest route to meet your friends work with contacts and maps, you can see quickly where they are. other and keep in touch, never lose track of your family. If you have lost your team, you can use the same app to notify your friends of your where it is. Find my friends (iOS) Related: a, there is an integrated track record keeps your Android phone, and you can see the details you never knew that Android phone maintains a recording of all the locations you have visited. There is no exception for iPhone users and there is an alternative solution to see how iPhone keeps a record wherever you go. Friends who use AndroidFind My friends show where all your friends are on a map and continuously update their exact positions. You can even chat with friends located at the same time to help coordinate and meet in the same place. App supports the text of the group to allow group messages to be sent to the members of the party team or to your teammates. If your friends don't have a smartphone, you can still use the app Find my friends to locate them. Send them an invitation via text.
