Day r survival quest guide

After reaching the first survivor (magnitogorsk) field, the missions require you to visit several other survivors, so it becomes important to know where the campsite is, in the end you will waste enormous quantities of petrol or diesel. There are 9 survival fields magnitogorsk, Chelyabinsk, Sverdlovsk, Tiumen, Petropavlovsk, Omsk, Novosibirsk, Krasnoyarsk, Irkutsk · "Woman" can be found in all fields and let yourself be resting for a while in the fields in exchange for some caps - 5 days: 25 caps / 12 days: 25 caps / 12 days: 25 caps / 120 days: 250 caps - if you are wounded or you have to do a boring job that will take time, using this function could be of great help a, A · "Trader" is also in all fields, but everyone offers different things. (I will write more about this topic in my further post.). It is not possible to find any cement in the city, where the survival fields are located. There is also fewer supplies in all buildings in the city (but you can still find a good quantity of petrol or diesel in petrol stations) Survival field 1: magnitogorsk \tilde{A} , \hat{A} · Svetlana \tilde{A} ¢ - She is the doctor, it is likely that it is the first survivor you will meet \tilde{a} , - d \tilde{A} [books], [Oakum] quests \tilde{a} , \hat{A} · Sanya \tilde{a} , - the upright "It can provide chitin sets of armor (for 100 chitin) and gun cartridge cases \tilde{A} ¢ - d \tilde{A} [chitina] quest \tilde{A} ¢ \tilde{A} , \tilde search: she dà [toys] [child] quests ã, · klavy à ¢ - The veterinarian à ¢ - DÃ [German translation] Quest. List of changes in beta 585.In addition to the "search for truth", "family issues" were also revised. Now you don't need to go to Vladivostok to save your daughter (and the helicopter will no longer take away from you!). The research "The Way Home" (the new name "GAMILY MATTERS") will accompany you in a discreet way throughout the first part of the game, and in the process of completing the research you will learn much more about your past, the fate of Gali and Sasha, and more you'll go, more surprises there will be ... And this story will soon be continued :-) An advice for those who have already crossed the old plot: I forget everything you knew. Even apparently familiar events in the new story can have a completely different meaning! For the complete plot of new experiences, we recommend starting a new game. Possible appearance Hero general appearance General survival information, RPG, Research release date The TLTGAMES developer Android TLTGames platforms, iOS Single Player game game mode, multiplayer day R Known also as day R Survival is a game from a small development company from Togliatti, which takes place in Post-nuclear Urss. The official wiki defines its kind as a "post-apocalyptic research", but in reality the game is a fascinating sandbox, with an interesting plot and a world world map. Unusually large scale is huge: no, it is huge. It covers the entire territory of the USSR and many neighboring countries: the western edge of the map is in Germany, at the eastern border is in Japan. It is the map that occupies a key position in the gameplay: on the rise, you can see more detailed places - cities, survivors' settlements, bandit losses, while remembering formally on the world map. When talking about the world and the plot, Mastio A Mind that there are two versions of the game: the update of September 2018 and the previous one. They differ from missions, a map of settlements and the staircase of the catastrophe that struck the world: if in the first versions of the bioplague cleaned up the whole European part of the RSFSR, and the first settlements of life are found in the Urals, then in the Villages of survivors to Tver and Tula. Plot unlike many stereotyped post-apocalypses, the desert here is not purely nuclear, but nuclear-biological: the war has begun with the use of a supervirus from sabotatori in Soviet territory, and then an exchange of nuclear attacks had place. Most people died from one or another, who was able to develop the immunity to the disease - has survived and has become a colonic or a main character Bandit. The also survived, establish somewhere in the North of the Murmansk region, but the problem is that it has gained amnesia from everything that had experienced. Therefore, he should not only investigate the political novel with the saboteurs who have started the apocalypse, but also remember the house of him. Role system is based on competences, which are divided into two groups: fighting and crafting. The former influence the probability in battle with opponents. The second is what the elements can be created. The skills are pumped like in Tes, what is done is the condition of the Pumped. The character is described by a series of parameters: exhaustion, hunger, thirst, fatigue, irradiation, poisoning and bleeding. Exhaustion is the main parameter of vitality, which is influenced by everyone else. Maximum exhaustion is the death of the character. You are hungry, you don't get enough sleep, you take radiation or drink toxic water - and together with the growth of the corresponding parameter, exhaustion will grow. Combat system The combat system is rather primitive: everything is decided by self-combat. Based on your ability and characteristics of the enemy, the outcome of the battle is determined, the damage suffered by you, the amount of ammunition consumed. Oponents are of two main types: roaming creatures and permanent banditous fortresses. The first are classic "casual meetings". In the event of a collision with a creature, it is determined first if you noticed or not, if you will have to fight. Camouflage Army gives excellent bonuses for cleaning, but does not protect well in battle: there is only a helmet and armor armored for the real armor, the rest is piece of rag with a minimum protection. Bandit fortresses are sitting in place and waiting for you to look at them for a light. If you decide to look into, the battle will start, and in case of success, you will get a lot of booty. If, while around the ruined city, it is better to put on the heavier armor.in every battle, you can get light injuries - displayed by the bleeding parameter. In case of a struggle with a strong enemy, you can get obtain Wounds - trauma. There are three types of injuries: trunk, arms and legs. Paradoxically, the wounds to the body are the most harmless: only they do not allow you to put on a bulletproof vest. Wounds in the hand do not allow you to take a trib, gun or two-rod machine gun, and are forced to use only the guns. The injuries to the leg, the most unpleasant ones make the use of a bicycle, trolley or motorcycle impossible, which means that they are facing a choice: or to throw away most lubloper and continue on foot, or do one Stop for two weeks up to the healing leg. Survivor settlements The surviving settlements are located near some cities, who live and adequate people live there, with which you can speak, and don't fight. The first and main service provided by settlements is a hotel, here indicated as a "base house". For the in-game currency - bottlen caps - you can stay there for 5 or more days with full safety, which is extremely useful in the treatment of wounds and diseases. Sometimes, in order to obtain access to the refuge, it is necessary to complete a mission (for example, to Sverdlovsk, where, due to the terrifying health and epidemiological situation, the refuge is closed to bring a lot of lü soap). In some settlements (in old version in almost everyone) engage in barter, which offers the exchange of certain goods for others. Finally, there are NPC quests that give secondary missions. Capsules caps perform a double role here: it is both an in-game coin that can be honestly earned (removed from pepsi-cola bottles, booty in the bandit fields, make missions), and a donor token for young cheaters. They can be spent in two ways: they can be paid to live in settlements, or you can buy objects in a donor shop. The donor shop is available at any point of the map. If you are not a young cheater and role play it is important to you, you can only use the shop in colonies and spend only honestly gained Kryzhka. Online mode The game can be played in online cooperative mode (PVE). In this mode, several players are present on the map at once, which can exchange things and go on joint raids. Especially for this, super-powerful bandit bases have been added to the game, entire banned city, which alone, even with the utmost pumping, can only be taken from persistent scams (the probabilities of winning are 2-7%). There are five of them: Girin, Petropavlovsk-Kamchatsky, Magdeburg, M be snow storms. Ragged Bandit: bandits from small and medium bases are dressed in God knows what and are armed with crossbows and self-propelled guns. Organic weapon: a supervirus developed by a traitorous Soviet scientist and transmitted to the CIA (not otherwise, the scientist heard "voices" enough and believed that only civilized people could be entrusted with such dangerous knowledge). Civilian people immediately sent virus cancered sabotators for the USSR and ordered a massive bio-attack against the Soviet Union. But something went wrong: a crowd of refugees swifted infected through the borders of the USSR. The civilized world has decided to stop the epidemic with a nuclear carpet bombing, and then the "perimeter" triggered and launched an answer in automatic mode. As a result, no one seemed a little. Disaster Diary: While investigates the details of the Apocalyptic War, the main hero will have to find and read more than such a document. Scavenger: GLAV Hero. The ruins of radioactive cities is the main method of obtaining resources for processing (even if not the only one). Coat, hat and mask: or rather, a gas mask. After pumping the sewing skill until the end, the main hero can sew yourself a cowboy style dress, with a long anthers, and a wide-brimmed hat. It is quite logical to integrate it with a gas mask. Only The metal armor is more fresh than this dress, which many players do not care about: having worked in the mechanics, it is possible to repair the pre-war armored vehicles, which gives more protection of the metal armor. A beneficial curse is the disease of the moon, which gives more protection of the metal armor. A beneficial curse is the disease manifests itself in exhausting insomnia, however, all the negative effects of this disease are easily removed with activated carbon - the most economical, widespread and promptly available in the desolate land, and there are only advantages - the capacity to stay awake. Everyone would be so sick! Scary arms: aversion! "Friendship" is not at all terrible, because it is impossible to use it for combat purposes. It is used for its expected purpose - for the abatement wood and as a motor donor for mounting a motorcycle trolley and a gasoline generator. Traumatological hotel: in settlements. On the brakes, since the wounds must first be stabilized by themselves, and then lie in the refuge. Gourmet horror: in the early stages of the game, you will have to eat rats, fried on a stick. Abuse the rotten or raw food, however, it's not worth it - you can get sick with the worms, and this is extremely unpleasant. What idiot? The inventor of the virus. He gave the champion to the CIA and ruined the world. BORN. To give the order of a nuclear bombardment in a country where, according to intelligence data, the military command remains and there is a well-protected tube brain that can take control of nuclear forces in the event of death of the command? What can go wrong? Shit, billy, push the button! Ecstasy Gourmet: Having properly pumped cooking skills, you can cook Pilaf, Kebabs, Kulebyaki and other yummy from Wasteland's raw materials. The highest embodiment of the command? What can go wrong? Shit, billy, push the button! Ecstasy Gourmet: Having properly pumped cooking skills, you can cook Pilaf, Kebabs, Kulebyaki and other yummy from Wasteland's raw materials. the culinary excellence in the game is considered, however Shawarma. Yes, that dish "from dogs and cats". Shawarma's power is so beautiful that relieves fatigue, it heals exhaustion and completely removes hunger and thirst. The Lembas Elven is not so miraculous. Video Game Pages in the category "Video Games" Apex Legends, Baldur "S Gate, Bayonetta, Bit Dungeon, Children of a dead land, Clive Barker" S UNDITIVE, COSMOTEER, Crusader Kings II, Dark Souls I, Dawn of War, day R, Disciples, Dragon Age, Elex, Encona, Epic Battle Fantasy, Far Cry Primal, Fran Bow, Frostpunk, FTL: Fast Light, Genesis Rising: The Universal Crusade, Gothic, Gris, Hitman 2: Silent Assassin, Inside, Jade Empire, Jade Alliance 2, just ignore them, the Kerbal Space program, Kill Switch, King's Bounty, Kingdom that comes: Liberation, Small misfortune, in the 1980s of the last century, a disaster hit - a nuclear war that destroyed Almost all population. Animals turned into bloody monsters - even rats can cause serious injury. Radiation on some objects are out of staircase, you have to wear protection. A deadly virus awaits those who survived the conditions of war are such that any factor can kill. Download R Premium on your PC and you will find a huge number of skills to develop, there are many missions. On the road it meets monsters - more often animals, transformed into a kind of radioactive deaths. The difference lies in a type of interesting combat - takes place on a field similar to a chessboard. Walk only left / right or down / up, so not all cells are available simultaneously, first approach. The enemies hits, even a meeting with a mouse is painful. Some opponents launch bullets, and do not need to approach - strikes are delivered remotely. And the outcome Battle depends only on the choice of the hero's weapon. The application is captivating, the huge map with the Soviet cities like it. Buy a car or build one yourself. Build a house, a bitch, cellar. Collect food, visit the forest, search for ammunition and weapons, improves abilities. In short, short, It is difficult to break away from the program, even actuality are not able to distract for a long time. Description The developers have made their best and have created an interesting design. Made in slightly muted colors, perfectly emphasizes the events that happened and had passed it. Play day R Premium on PC is even more pleasant due to this feature. Animation is impressive - there is a change from day to night, the season is replaced by the next and these changes are displayed. If it's dark, so you won't be able to look for things. There are two options - create a torch, or find / purchase a flashlight. The game currency is able to make any laughter - not gold, not dollars, not even crystals or other precious stones ... these are ordinary gold protections. Apparently, after a nuclear war, they are more precious currency and a gameplay has plugs collect, they provide benefits. Go to the store, located in the lower left corner. For blankets, you will be able to buy a machine gun, cartridges, vehicles, medicines, food / water, petrol / diesel, a protective suit, a gas mask. Remember, a gas mask is necessary first of all - by inserting a overflowing territory of radiation, they inflict serious damage to the hero. Don't forget to improve your abilities, otherwise you will not be able to do the construction, chemistry, and other useful things ... For example, be sure to build at least a pirogue, or rather a wooden house. Then it will be possible to earn strength more quickly and health replenish. Products left at home deteriorate more slowly, there is no need to bring all things into a backpack, leave them at home, in a chest. It is advisable to accumulate caps and buy a vehicle with fuel - the location is really huge, you don't want hundreds of miles to walk. Play day R Premium on your PC so you don't have to see constantly inside and out on the map. If you are not interested in shopping vehicles then do with my hands ... going in the schematic section, find the mechanical category. By clicking on the selected vehicle, you will see the necessary components and their quantity. All that remains is to assemble the parts and create a transport, even an electric car circuit is available (saving on fuel) and a helicopter (it will take several hours to overcome hundreds of kilometers) the diagrams contain drawings of a home, a launcher rocket (and other Cool weapons), useful elements of everyday life. Be sure to look out for three indicators - thirst for water, hunger, energy. The first two are more important. The backpack must contain at least two bottles of clean drinking water and something to eat. The easiest way to find berries is in the forest, but don't confuse with a wolf berry, it is unlikely to be useful. If there is no snack or drink, the hero will die and start again from the rescue point. By the way, save your progress by clicking the à ¢ Savea button in the upper left corner. It is advisable to perform this action more often. Peculiarities include an interesting style of combat - there is a field, on three opponents, and a character. Try to get to the enemy quickly and kill him, causing damage. It's a little clear how to change a regular knife for a gun. Perhaps, first you need to master the ability to use melee weapons, having a level reached, you will be replaced with a machine gun. Quest are pleasant, but the elements are often needed to complete the operation. For example, if the hero has not created a torch, which he will not be allowed to access the room. Sometimes it is necessary to send the character to the tent so that he sleeps. During the holidays, Developers organize surprises. For example, in a couple of winter, driving past a forest or river, bad snow puppets can attack and you will have to fight with them. After downloading the Day R Premium game to an online computer, you will not regret this action. The map is not limited to locations - there is no need to wait long for a place to a one So the main position. Just click on the screen, the program will draw a path in the form of a green arrow, then click the stroke icon. It is advisable to avoid water, the movement is very slow on it. Pro and cons advantages: huge map; The development of competences; Enthusiasmant missions; assessment of the interesting game; Single battlefield; Realistic implementation; Large design; Management facilities. Defects: It is not clear how to improve ability. How do I install R Premium day on a computer or a PC? You will need a special emulator, choose between these - e. He creates conditions as a market game ... the downloaded archive will open only with the help of him. There are two methods to install via the emulator: download the emulat Download the archive with the application and drag to the Emulator menu; The game will be beginning. - Day "Z" came, when the number of zombies has passed the number of zombies have not zonbies There are only a handful of survivors on the left, they must fight every day for the right to live. Heroes must spread knowledge about how to survive in this new and terrible world, otherwise there is no hope; System Requirements The laptop / computer must meet the minimum parameters listed below in the list: operating system - Windows from XP and later; Processor - Intel / AMD; Operating system - 2 GB and more powerful; Free disk space - 4 GB onwards. Day R Premium on PC, you will understand how addictive. Walk where you want, visit abandoned cities, ruins, craters, woods and uncultivated lands. Develop, improve skills, complete the activities. Craft household items, weapons, protection, homes and vehicles. Fight for life and hope that the character can find their family or other people living. There is also a possibility that you will solve the mystery that caused the apocalypse. City in day R are the primary source of survival elements. Most cities have survived buildings. They contain elements corresponding to the type of building. For example, in the dining room, the food will be very probably, and in the houses there will be games. The cities are dangerous for the high level of radiation - do not stay in them for a long time. It is better to camp on the city border and look for it with short raids Otherwise, radiation will kill you. Survivor Based surviving majority bases are located on the urali. In the city: Magnitogorsk, Chelyabinsk, Sverdlovsk (Ekaterinburg), Petropavlovsk, Omsk, Novosibirsk, Krasnoyarsk, Irkutsk.
